EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION:

Please replace the first paragraph on page 1, amendment to the specification of dated 7/5/05 with the following amended paragraph:

- This is a continuation of U.S. patent application Serial No. 10/235,347, filed on 09/04/2002, now U.S. Patent 6,660,175, which is divisional of U.S. Patent Application Serial No. 09/178,194, now U.S. Patent No. 6,309,054, filed October 23, 1998 for "Method of Forming Pillars in a Fully Integrated Thermal Inkjet Printhead," of Kawamura et al., the content of which is incorporated herein by reference and made a part hereof.

IN THE CLAIMS:

Cancel the withdrawn (non-elected) claims 22-23, wherein the election was made **without traverse** in the reply filed on 3/10/05.

Terminal Disclaimer

2. The terminal disclaimer filed on 7/5/05 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of U.S. Patent 6,641,744 has been reviewed and is accepted. The terminal disclaimer has been recorded.
3. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest an etching process to form pillars by uncovering a plurality of openings, wherein the openings are formed through a thin-film structure and into the substrate and which openings are filled with material of the top layer.
4. The closest prior art Pan (4,894,664) discloses a process of forming pillars by an etching process but fails to teach that the pillars are formed by exposing or uncovering the filled openings, which is formed on the opposite side through a thin-film structure and into the substrate.
